

# ADVANCED PHLEBOTOMY TECHNIQUES FOR FACILITY NURSING STAFF

**SUCCESS WITH EVERY STICK**

In situations such as COVID19 where only dedicated staff may draw patients, many facilities have found themselves in stressful situations. One new burden is the need for dedicated staff to perform venipuncture. In some cases for the first time since nursing school. And that's why HHL has created a specialized intensive course to share our expertise and sharpen the skills of your team.

## YOU'LL LEARN:

- ◇ Needle Safety
- ◇ How to handle the unique obstacles of geriatric and long term care patients
- ◇ Complex vein collection methods
- ◇ Optional on site sticking clinic

You can refresh your skills through trial and error, delaying patient care and giving more than your fair share of bruises along the way, or you can master your phlebotomy skills the quick and effective way, through training with the experts.

## Why choose workshop training?

When you attend a workshop you have the opportunity to completely focus on the topic at hand—without outside distractions and the ability to drill down to what really matters. Our trainers are experts with a high level of experience, providing you with the unique opportunity to ask specific questions and get real, practical advice about the scenarios you encounter every day. Plus, a live workshop is an excellent networking opportunity to meet other healthcare providers and find out what they are finding to be successful in our COVID19 environment. There are lots of ways to learn in today's world, but nothing compares to a live workshop with hands on instruction. Contact HHL's HR department to register.
